JOBVITE WINTER RELEASE 2026

What's New in Jobvite

Platform Upgrades, Forecasting, and Onboarding Improvements

Your platform just got faster, smarter, and more reliable, with new updates to help your team hire better and strengthened stability you can count on.

Continuous Improvements

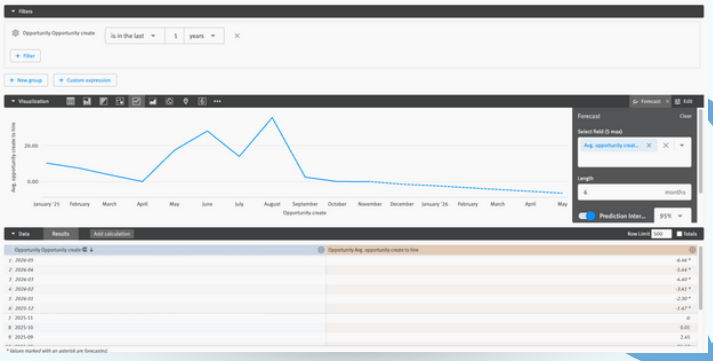
We've shifted from quarterly releases to ongoing updates throughout the year, so you get new features and fixes faster—not on a quarterly schedule.

- **New features arrive faster:** Access improvements as soon as they're ready
- **Fewer disruptions:** Smaller, incremental updates mean a more stable platform
- **Adopt at your pace:** Easier for your team to absorb gradual changes than big quarterly drops
- **Stay competitive:** Get the latest innovations without waiting months

What's New

Forecasting in Analytics

Predict demand spikes and pipeline slowdowns to balance workloads and hit hiring goals.



Single Sign-On (SSO) for Onboarding

One secure login across Jobvite ATS and Onboarding—no more managing multiple passwords.

An employ ATS

Onboarding Start Date

New hire communications now automatically displays the correct start date.

Learn more about Onboarding for Jobvite.

LinkedIn Integration Update

Meets new LinkedIn requirements to keep your jobs visible and compliant.

Performance and Security Upgrades

While you've been focused on hiring great talent, we've been hard at work improving the foundation of your platform.

- Seamless platform updates delivered without disrupting your hiring workflows
- Faster issue resolution keeps your systems reliable and responsive
- Upgraded data infrastructure delivers faster analytics and more accurate reporting
- Strengthened security and stability protect your data and operations
- Proactive security testing catches vulnerabilities before they affect you
